Figure 10

a. Randomisation of Loop IV.

IV

IV

X represents the mutation of the natural amino acid to any other amino acid. One, more or all of the amino acids can be changed in this manner. This figure indicates all the residues have been changed.

b. Insertion (or replacement) of Randomised sequence into Loop IV.

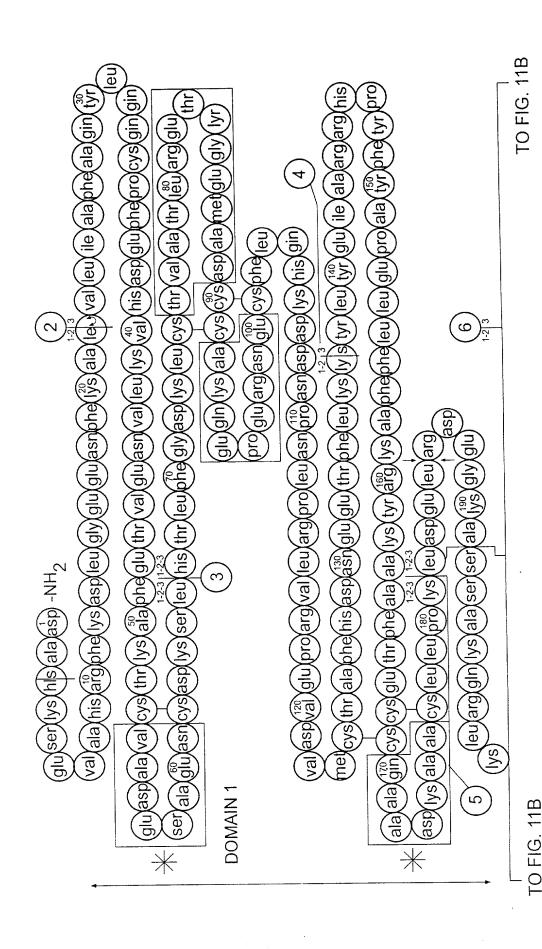

IV

The insertion can be at any point on the loop and a length where n would typically be 6, 8, 12, 20 or 25.
